antiseptic creams & dressings
- ✔ Insect repellent and treatment
for bites and stings
- ✔ Travel sickness tablets

Travel tips and Advice

 Always wear sunscreen - when Buying sunscreen, the label should have the letters "UVA" in the circle logo and at least a four star UVA protection. Additionally ensure that the SPF is 15 or above to protect against UVB.

 Make sure you have plenty of water to drink.

 Applying a good mosquito repellent to exposed areas of the skin is essential to avoid being bitten by mosquitoes.

 Avoid strong perfumes, scented hand or body creams as they can attract mosquitoes.

Travelling with Medication

Always carry your medication in a correctly labelled container, with a spare supply in your suitcase in case you lose your hand luggage. Also take a copy of your prescription and a letter from your GP giving details of your medication and why you need it. It could be useful if you require medical assistance while you are away.
